

MSAS'2010

6th EDITION OF THE MALI SYMPOSIUM ON APPLIED SCIENCES

Bamako, August 1-7, 2010

<http://www.msas.maliwatch.org/msas2010/>

Important dates

**Deadline for the
submission of the papers
(4 pages max.):**

February 15, 2010

**Notification of Paper
Acceptance/Rejection:**

March 15, 2010

**Deadline for the
submission of final version
(6 pages max.):**

June 15, 2010

The sixth Mali Symposium on Applied Sciences (MSAS'2010) will be held in Bamako from Sunday, August 1, to Saturday, August 7, 2010. The conference will be open to students and researchers in industry and in the academy and will enable engineers and scientists to present their research findings. The conference will cover applied sciences in a broad sense.

Scientific Disciplines

Agriculture, Arts, Chemistry, Economics and Finance, Education and Languages, Engineering and Industrial Applications, Engineering Sciences, Environmental Sciences, Information and Communication Technologies, Life Sciences and Public Health, Livestock Management and Rural Development, Mathematics, Mechanical and Civil Engineering, Medicine, Physics, Social Sciences.

MSAS'2010 will be divided into four events: **mini-symposia** (organized by scientific discipline), **plenary sessions**, **special workshop sessions and trainings/tutorials**. These events will be coordinated to provide a comprehensive and well-balanced program.

The goal of the **special workshops** is to stress interactive and open discussions in preference to sequential presentations. It should bring together a group of knowledgeable people focusing on a current or potential "hot topic" of interest to our society.

Plenary sessions consist of an invited introductory 50-minute tutorial, in addition to contributed papers on the program. Presentations will be in the form of presented papers and/or poster displays.

Mini-symposia provide a format for a focused exploration of particular issues or techniques within a traditional presentation framework; in these cases too, adequate time should be reserved for questions and general discussion.

Trainings/tutorials are offered to balance theoretical and applied knowledge in a classroom or a laboratory environment. These trainings will be delivered by well recognized experts.

Call for papers

Participants to the mini-symposia and workshops should send (by e-mail) an extended abstract by indicating the title of the presentation, the complete address of the corresponding author (name, mailing address, fax, telephone and e-mail), keywords and scientific area / discipline to:

Abdoulaye Zana BAGAYOKO

E-mail: abdoulaye.bagayoko@msas.maliwatch.org / msas.communications@msas.maliwatch.org

The extended abstract, which should not exceed four pages, has to clearly explain the approach and the results of the research, and present a compelling case since it forms the basis for the acceptance or rejection of the paper. The accepted papers will be published in the Symposium Proceedings. The scientific committee will evaluate all submitted papers and decide which ones will be delivered as oral presentations or presented as posters.
